

Exercises for Day 1

Exercise 1. Print these lines to a file called `Day1_Ex1.txt`:

```
My name is yyy.  
My campus mailbox number is CMzzzz.
```

You should use a **SINGLE** `fprintf` statement to accomplish this task. You should also replace `yyy` and `zzzz` with appropriate text. Using the homework template, submit the code you typed in the Command Window and the output to the text file `Day1_Ex1.txt`.

Exercise 2. Print these lines to a file called `Day1_Ex2.txt`:

```
My name is yyy.  
I am in Computer Programming Section xx this quarter.
```

You should use **TWO** `fprintf` statements to accomplish this task. You should also replace `yyy` and `xx` with appropriate text. Using the homework template, submit the code you typed in the Command Window and the output to the text file `Day1_Ex2.txt`.
