Counselor Recommendation on Back

Counselor or Teacher Recommendation

This report is handled with great care to insure confidentiality. Your assessment of this student's potential for success at Rose-Hulman is an important part of the admissions process. To guide you in providing us with your assessment of this student, please keep the following in mind. You are welcome to use additional sheets of paper.

The fields of engineering and science require strong teamwork skills and cooperation. Students often work in groups of three or more. Also, time demands of a quarter system and the inherent demands of the study of engineering and science demand good time management skills. Finally, industry often looks to engineers and scientists for leadership. Your attention to these characteristics will help the admissions committee make a good decision for the student.
