

# Rose-Hulman Astronomy Club

## Meeting Minutes for 2008-09-11

### Astronomy Fact of the Week

The moon is moving away from the Earth at a rate of 3 cm per year.

- Some events we are thinking about in the future:
  - A trip to Turkey Run State Park, where there is less light pollution than Terre Haute
  - A picture-taking contest for club members
  - Messier Marathon in the spring
- This week it was too cloudy to observe, so we spent some time getting trained on the telescopes.
