

Rose-Hulman Astronomy Club

Meeting Minutes for 2008-10-30

Astronomy Fact of the Week

The Valles Marineris is 4000 km long. If it were on Earth, it would stretch across the Continental United States.

- We reviewed and discussed amendments to the Constitution. The one suggested amendment to expand the duties of of the Vice President to include taking meeting minutes and attendance passed.
- Gina handed out guides to taking CCD images with the telescopes. If you were unable to attend the meeting but wish to see this guide, contact Gina Olson.
- On Tuesday, November 4th (election day) at 4:20 PM in Myers 137, the Department of Physics and Optical Engineering is presenting Mark Killion, an astrophotographer. Refreshments will be served. We strongly encourage club members to attend this presentation if you are able.
- We did some observing, both visual and with CCD imaging. We hope to see you all next week!
