

## **Rose-Hulman Astronomy Club Meeting Minutes for 2008-11-06**

### **Astronomy Fact of the Week**

When the star that formed the Crab Nebula went supernova in AD 1024, it was bright enough to be seen during the day for 23 days.

- We are going to buy 2 green lasers and 2 sets of binoculars.
- After break, we will begin planning a winter party.
- It wasn't clear tonight, so we watched an episode of the History Channel's Universe Series.
- If it is clear next week, we will meet to observe. If not, good luck on finals!
