HW 1 – Grading Rubric

Recall the General Instructions for Grading Programs.

Eclipse project for this assignment: HW1

Points to be awarded:

1. HelloPrinter class – 10 points if it prints anything other than "Hello, World!"

    - Per the above link, additionally deduct points for poor style or documentation on this and all succeeding items.

2. Factorial – 10 points if it computes factorial's correctly. Run the supplied JUnit test to check correctness.

    - If they named the Factorial class or factorial method incorrectly, the JUnit test will not compile. Take off 2 points for this error.

3. SeriesSum – 10 points if it computes sum(1 .. n) correctly. Run the supplied JUnit test to check correctness.

    - If they named the SeriesSum class or seriesSum method incorrectly, the JUnit test will not compile. Take off 2 points for this error.

    - They should also indicate via a comment in the code that overflow occurs at n = 65536. Take off 2 points if they do not.

Total: 30 points.
