

ME430: Mechatronic Systems
Revised Project Proposal with Shopping List (5 Weeks)

For Week 5, you need to revise your project proposal based on any changes we discussed based on your Week 3 project proposal.

In addition, you need to add a detailed shopping list to your proposal. A detailed shopping list says exactly what part number you will purchase, what vendor you will purchase it from, how many you need, and the price. You may want to refer to the "Shopping List Hints" handout to make sure that you have remembered everything.

There are two reasons that I ask for this documentation:

1. In case I notice something that you forgot to order.
2. To encourage all groups to be at this stage by Week 5. You should order your parts-- **at the latest**-- shortly after we talk about your shopping list. You are allowed to order your parts before we talk if you wish.

You may wish to combine your purchases with other groups to save on shipping.
