

The exam has 3 problems. We suggest you prepare your workspaces before the exam as follows:

Problem 1: Start this problem from “template.c” but rename it to “Lastname\_Problem1.c”. This problem has one checkoff.

Problem 2: Start this problem from “template.c” but rename it to “Lastname\_Problem2.c”. Also add “LCD Module.h” and “LCD Module.c” to this project. This problem has one checkoff.

Problem 3: Start this problem from “template with interrupts.c” but rename the file “Lastname\_Problem3.c”. This problem has three checkoffs.
