

The exam has 2 problems. We suggest you prepare your workspaces before the exam as follows:

Problem 1: Start this problem from “template with interrupts.c” but rename it to “Lastname_Problem1.c”.

Problem 2: Start this problem from “template.c” but rename it to “Lastname_Problem2.c”. This problem will use the LCD display so perform all necessary steps to use “LCD Module.h” and “LCD Module.c”.
