

**LETTER OF APPERCIATION**  
**FROM**  
**GHANA POULTRY NETWORK**  
**TO**  
**THE ROSE-HULMAN INSTITUTE OF TECHNOLOGH-**  
**ENGINEERS WITHOUT BORDERS CHAPTER FOR THEIR**  
**PROJECT IMPLEMENTATION TRIP TO OBODAN-GHANA**

The Ghana Poultry Network(GAPNET) wishes to express our heartfelt gratitude to Engineers Without Borders-**ROSE-HULMAN INSTITUTE OF TECHNOLOGH-** Chapter for the Project Implementation Trip to Obodan in the Akupem District of Eastern Region of Ghana from 26th May to 9th June, 2008 .

The trip afforded us the opportunity to work closely and provided a platform for open interaction, dialogue and building of relationships. We appreciate the efforts of the team for their tireless desire to fulfill all the congested activities of the trip, having to visit many places/offices within a short period of time to buy necessary materials needed to complete the Adminstration Block in time. .

We are happy that you were able to endure the discomfort, sleeplessness and high traffics associated with the fous (4) hours journey by bus from Accra to Cape Coast and back.

Our special commendations go to the team members of the trip, Prof. Patrick Ferro-Faculty Adviser to the Ghana Obodan Project, Jesscia Lipscomb- EWB-Rose Hulman President, Nathan Hazard- Project Leader Ghana and all the working team members Adam Kirchner, Ryan Mcgiffen,Michael Krantz and Dana Ardre for their understanding, perseverance and cooperation without which success would not have been achieved.

We also wish to extend our appreciation to the Engineers Without Borders, USA , for their approval of the Obodan Project.

On behalf of the Obodan community and GAPNET, we say a big thank you to EWB-Roes-Hulman sponsors, donors and individuals who supported financially, materially and prayerfully to make their trip and stay in Ghana a success.

We look forward to working more closely with you on the successful implementation of more Project in Ghana..

Thank you and stay blessed.
