

CHEM 330 Biochemistry I

Sixth Week

October 10 – October 14, 2011

Assignments

- Chapter 10 – Reading should be completed before class on Monday (10/17/11)
- Chapter 11 – Reading should be completed before class on Tuesday (10/18/11)
- Chapter 12 – Reading should be completed before class on Thursday (10/20/11)
- Chapter 13 – Reading should be completed before class on Friday (10/21/11)

Reminders

- The solutions to the problem sets are posted on the course website for your edification.
- Exam 2 will be distributed this week. You are welcome (and, in fact, encouraged) to come to my office to discuss it. ***Please do not wait until the last minute to begin the exam!***
- Enjoy Fall break!***

“Creativity is the faculty of the mind or spirit that empowers us to bring into existence, ostensibly out of nothing, something of beauty, order, or significance.” – Peter Medawar

“A scientist must be resolutely critical, seeking reasons to disbelieve hypotheses, perhaps especially those which he has thought of himself, and thinks rather brilliant.” – Peter Medawar

“It is impossible to live without failing at something, unless you live so cautiously that you might as well not have live at all, in which case you failed by default.” – J.K. Rowling

“If you believe, before you start, that you will be unsuccessful, you are right.

...

If you believe, before you start, that you will be successful, you may be right or you may be wrong, but you will be beginning from a position from which success is, at minimum, a distinct possibility. Preparation for a professional life involves creating an unassailable belief in the possibility of success.”

I believe that you can succeed at anything to which you devote your talents.
