

## **CLUE #4: ROCK ON**

### *The Employees of Rockwood Construction*

Welcome to Rockwood Construction, Inc. Here at Rockwood we have many employees and we've discovered that each employee is most effective at certain times in the week.

Not everyone can be like Silicon who works best first thing Monday morning, but at least everyone gets going earlier in the week than Slate who waits for Friday afternoon for his best work. Sulfur and Aspen always work well the same day of the week, and Quartz works best on days when Oak is in the building. Too bad Oak is part time and works only on Tuesday and Thursday (not only that, but he's completely worthless on one of those days – I don't even know why we pay him).

Sandstone certainly works best in the morning and he makes sure to get his good work in sometime earlier in the week than Oak. Aspen likes to sleep in so he works best in the afternoon. Quartz gets motivated and works well right after he sees Sandstone doing good work, but he never gets anything done until sometime later in the week than Pine. The person in charge of the board meeting we call Partical Board, and he works well preparing all morning on the day of the weekly board meeting. He requires absolutely everyone to be at the meeting, even Walnut. Everyone works well sometime in the week whether it be morning or afternoon, and it seems like no one's best work overlaps with anyone else's. It's smart for me to know when they each work best so that I can at least keep some order around here.

Soon we'll be heading to a famous place. Can you tell me the name of the city we'll be in when we get there?
