

## Curriculum Vitae

Kurt Bryan  
Department of Mathematics  
Rose-Hulman Institute of Technology  
Terre Haute, IN 47803

e-mail: kurt.bryan@rose-hulman.edu  
www.rose-hulman.edu/~bryan

### EDUCATION

**Ph.D. in Mathematics** received May, 1990.  
University of Washington, Seattle, Washington.

Doctoral research focused on inverse problems related to impedance imaging.

**B.A. in Mathematics** received May, 1984.  
Reed College, Portland, Oregon.

Undergraduate research and thesis focused on techniques in the theory of transcendental numbers.

### EMPLOYMENT

**Professor of Mathematics**, Rose-Hulman Institute of Technology, Terre Haute, IN, 8/05 to 6/22 (Assistant Professor 8/93 to 7/99, Associate Professor 8/99 to 7/05), Associate Department Head 7/17-present. Emeritus 7/22 to present.

- Teaching and course development
  - Full-year introductory course in calculus, two-quarter sequence in differential equations, probability, statistics, many upper level courses in modeling, analysis (real, complex, vector, functional, harmonic), number theory, partial differential equations, discrete math, financial mathematics, numerical methods, image processing, and senior thesis advising.
  - Four years teaching experience in Rose-Hulman's nationally recognized Integrated First Year Curriculum in Science, Engineering, and Mathematics (IFYCSEM), an innovative full-year freshman course sequence that integrates traditionally distinct subjects such as physics, chemistry, mathematics, and computer science.
  - Developed or substantially revised many courses, including "Principles of Optimization" (with funding from the Lilly Endowment), "Mathematical Modeling" (with funding from the Foundation Coalition), "Calculus

of Variations” (to include modern topics such as optimal control and finite elements), “Partial Differential Equations,” “Mathematical Methods in Image Processing,” and a course on “Option and Derivative Pricing.”

In many of these courses, including the introductory Calculus and DE sequence, I’ve made integral use of computer algebra software (Maple) and/or Matlab.

- Led research groups (2002 to 2012) and assumed directorship (2004 to 2009) of the Rose-Hulman summer REU program in mathematics, an NSF-funded program in which 8-11 students spend 8 weeks in the summer doing mathematical research with Rose-Hulman faculty. My research groups have produced ten Rose Math Dept. Technical reports (three published in professional journals, several appeared in the Rose Undergraduate Math Journal).
- Co-founder, organizer, frequent speaker in the weekly Rose Math Seminar, now in its 25th year. This weekly seminar was started with several other faculty members. I have given many of the lectures, and we have covered such topics as multigrid methods, wavelets, the algebraic structure of the Fourier transform, combinatorial optimization, image processing, RSA encryption, and inverse problems. We’ve had over 300 talks by external speakers, Rose faculty and students.
- Organized (in years 1998, 2009, 2011, 2018, 2019, 2020, with others) the annual Rose-Hulman Undergraduate Mathematics conference, a two-day event with 100 to 150 attendees, in which students from around the country present their mathematical research.
- With faculty member John Rickert, developed and taught “Jump Start” for five years, a one week summer program for incoming freshmen who need extra preparation in math, physics, and use of the computer.
- Taught three years in the “Fast Track” calculus program, a summer course for talented incoming freshmen. The course takes these students through the entire first-year calculus sequence in five weeks and makes extensive use of Maple, a computer algebra system. The students are able to begin their Rose career in sophomore-level mathematics courses.

**Staff Scientist**, Institute for Computer Applications in Science and Engineering (ICASE), NASA Langley Research Center, Hampton, VA, 8/90 to 7/93. Consultant, 7/93-9/94.

- Worked with NASA Langley researchers to derive inverse heat conduction models suitable for use in the non-destructive testing of materials, analyze the models, develop suitable numerical methods, collect and analyze laboratory data to verify the accuracy of the mathematical models.

- With Michael Vogelius of Rutgers University, examined the problem of detecting and identifying cracks in electrical conductors, as a means of non-destructive testing. Devised and implemented numerical algorithms for the location of multiple cracks in a conductor. With University of Michigan researchers, collected experimental data to verify the accuracy of the model and efficiency of the algorithms.

**Mathematician/Statistician**, Blount Industries, Oregon Cutting Systems Division, Portland, Oregon, 5/84 to 7/90.

- Developed and programmed mathematical and numerical models to investigate the behavior of mechanical systems and manufacturing processes.
- Researched techniques and wrote comprehensive software package for signal processing and time series analysis related to mechanical vibration.
- Developed and utilized a variety of statistical techniques to design and analyze experiments for evaluating product prototypes and laboratory measurement systems.
- Organized, prepared texts for, and taught courses in statistics for engineering and lab personnel.

### **Visiting and Adjunct Positions**

- Applied Mathematics Researcher, Research and Development Group, Crane Payment Innovations (Malvern, PA), 7/14 to 7/15, 6/16 to 8/16, and 6/17 to 8/17. Carried out research on machine learning and computational optics related to new product development, taught short courses in statistics and machine learning.
- Distinguished Visiting Professor at the U.S. Air Force Academy, 7/10 to 5/11; taught multivariable calculus, advised two senior theses, collaborated with US-AFA faculty on mathematics course development and research, gave a series of departmental lectures on modern topics in applied mathematics.
- Visiting Professor at Rutgers University, 8/99 to 6/2000 and 1/07 to 5/07; conducted research with Michael Vogelius in the mathematics department, gave several graduate seminar lectures on inverse problems, taught linear algebra and PDE classes.
- Adjunct professor (numerical analysis class) at Christopher Newport University, 1/91 to 5/91.

- [7] Zhen Ni, “Simulation and Analysis for Optimal Strategy of a Bill Dispenser,” (industrial project for Crane Payment Innovations), winter/spring 2016-17.

Students in items [3]-[5], as well as senior thesis [8], were part of an interdisciplinary research group run by Deb Walter in ECE from 2013 to 2017, working with funds from the Air Force Research Laboratory in Dayton, Ohio.

### **GRANTS AND CONTRACTS**

- [1] (co-PI) “A Proposal to Develop a Course in Optimization and Optimal Design,” for \$5,000 funded in February, 1994 by the Lilly Endowment. Co-authored with Yosi Shibberu, the grant funded summer support for the development of an interdisciplinary engineering-oriented optimization course at Rose-Hulman.
- [2] (PI) “A Proposal to Develop a Course in Mathematical Modeling,” for \$9,500, funded in May, 1995 by the Foundation Coalition. This grant brought together a team of engineers to help develop a new junior/senior-level course in mathematical modeling using conservation laws.

- [3] (co-PI) “Inverse Problems in Thermal Imaging,” NSF Grant #DMS-9623279, for \$85,000 funded from June 1996 through June 1999. This research grant was written jointly with Lester Caudill at the University of Richmond and funded through the RUI program and Mathematical Science Division of the National Science Foundation.
- [4] (co-PI) “Computational Group Theory, Hyperbolic Geometry, Number Theory, and Inverse Problems NSF-REU,” #DMS-0097804, for \$144,000 funded from 2001 through 2003. This grant (Allen Broughton was the PI) funded a three-year renewal of our mathematics summer REU program; I directed groups of 4 students in the summers of 2002 and 2003.
- [5] (PI) “REU Site: Rose-Hulman Undergraduate Research Experience in Mathematics,” NSF Grant #DMS-0352940, for \$167,000 funded from April 2004 through April 2007. A three year grant to support Rose-Hulman’s summer REU (“Research Experiences for Undergraduates”) program in mathematics.
- [6] (PI) “REU Site: Rose-Hulman Undergraduate Research Experience in Mathematics,” NSF Grant #DMS-0647121, for \$187,000 funded from April 2007 through April 2010. A three year grant to support Rose-Hulman’s summer REU (“Research Experiences for Undergraduates”) program in mathematics.
- [7] (senior investigator) “REU Site: Rose-Hulman Undergraduate Research Experience in Mathematics,” NSF Grant #DMS-1003924, for \$310,000 funded from April 2010 through April 2013. A three year grant to support Rose-Hulman’s summer REU (“Research Experiences for Undergraduates”) program in mathematics.
- [8] Funding from the U.S. Air Force, \$135,800 to support a position as as Distinguished Visiting Professor in the mathematics department at the U.S. Air Force Academy, July 2010 to May 2011.

## CONSULTING

- [1] Consultant for ICASE, NASA Langley Research Center, 7/1-7/19/94.
- [2] Consultant on NSF grant “Analytical and Numerical Studies of Direct and Inverse Problems for Parabolic Initial-Boundary Value Problems”, DMS-0104205, (PI Lester Caudill), 8/15/01-6/30/05.
- [3] Short course on compressed sensing, 10/13-10/14/11, and consultant (10/11 to 8/17) for MEI (West Chester PA) (now Crane Payment Innovations).
- [4] Consultant for Chromation LLC, 8/11-8/14.

  - Colorado School of Mines, October 29, 2010.
  - University of Kentucky (SIAM student chapter), March 22, 2016.
- [34] "Fast Algorithms for Imaging Cracks with Impedance Data," University Colorado at Denver, September 20, 2010.
- [35] "How Can I Do Research in Mathematics? I'm Only An Undergrad!"
- Kansas State University, October 11, 2010.

- Florida Gulf Coast University, January 25, 2013, as part of the ASPIRE conference.
- [36] “Seeing the Unseeable: The Mathematics of Inverse Problems,” Bellarmine University, February 7, 2011. Part of Bellarmine University’s “Mathematics and the Public Good” lecture series, aimed at talented high school students and the general public.
- [37] “Thermal Detection of Small Cracks”
- Applied Inverse Problems 2011, Texas A and M University, May 25, 2011.
  - Center for Communications Research West, San Diego, February 17, 2012.
  - Cornell University, CEE Structures Seminar, April 4, 2012.
  - SIAM Annual Meeting, Minneapolis, July 10, 2012.
  - Applied Analysis for the Material Sciences, CIRM (Marseilles, France), May 29, 2013.
  - University of Houston, March 9, 2018.
- [38] “Making Do With Less: An Introduction To Compressed Sensing,”
- Indiana State University, September 28 and October 4, 2011 (2 parts).
  - Florida Gulf Coast University, November 9, 2011.
  - Kansas State University undergraduate colloquium, September 10, 2012.
  - Keynote address, Purdue University, April 5, 2013, as part of their Computational Science and Engineering Student Conference.
  - Iowa State University, April 29, 2014, mathematics seminar.
  - University of Scranton, September 16, 2014, mathematics seminar.
  - Amherst College, October 20, 2014, mathematics seminar.
  - Moravian College, March 2, 2015, mathematics seminar.
  - Purdue University Calumet, November 14, 2016.
  - University of Houston, March 8, 2018.
- [39] “An Introduction to Inverse Problems,” Cornell University (Dept. of Civil and Environmental Engineering), April 6, 2012.
- [40] “Compressed Sensing Techniques for Localization of Radio Frequency Emissions,” WISENET (Wireless Intelligent Sensor Networks), Duke University, June 10, 2014.
- [41] “Dictionaries and Sparsity for Machine Learning,” Florida Gulf Coast University, April 22, 2016.

- [42] “Source Identification With Compressed Sensing,” Kansas State University, April 25, 2017.
- [43] “Picture Perfect: The Mathematics of JPEG Image Compression,” Florida Gulf Coast University, February 22, 2019.
- [44] “PID Control Theory in an Undergraduate ODE Course,” SIMIODE Online Expo, February 13, 2021.
- [45] Four talks, “Falling Shuttlecocks and the Akaike Information Criterion,” “The SIMIODE Textbook,” “Introducing ODEs Through Modeling and Applications,” and “Fourier Analysis of Signals” at the SIMIODE Expo (virtual), February 2022.
- [46] “The SIMIODE Textbook,” in the MAA Open Math workshop “Modeling Inspiration for Differential Equations,” (virtual), July 2022.
- [47] “Cruise Control,” at the SIMIODE Expo (February 2023 online) and Florida Polytechnical University (March 28, 2023).

## **PROFESSIONAL SERVICE**

### **Conference, Minisymposia, and Short Course Organization**

- [1] Co-organizer for *Rose-Hulman Undergraduate Mathematics Conference* (with Yosi Shibberu) March 1998, with Steve Galinaitis, March 2009, and Joe Eichholz, March 2014, 2018, 2019.
- [2] Co-organizer for minisymposium “Inverse Problems in Nondestructive Testing” (with Lester Caudill), SIAM annual meeting, Toronto, July 17, 1998.
- [3] Organizer for minisymposium “Inverse Problems in Thermal Imaging” Applied Inverse Problems conference, Vancouver BC, June 2007.
- [4] Co-organizer for minisymposium “ODE Modeling in the Driver’s Seat” (with Brian Winkel), AMA/MAA 2011 Joint Meetings, New Orleans, January 2011.
- [5] Co-organizer for minisymposium “Computational Modeling in the Undergraduate Curriculum” (with Joe Eichholz and Jeff Leader), AMA/MAA 2013 Joint Meetings, San Diego, January 2013.
- [6] Co-organizer for short course “Wall to Wall Modeling Scenarios for Differential Equations” (with Brian Winkel, Patrice Tiffany, Rosemary Farley), 2020 Joint Meetings, January 2020.

- [7] Co-organizer for minisymposium “SIMIODE - Differential Equations: A Toolbox for Modeling the World in Your Classroom with Your Students, Parts 1 and 2” (with Brian Winkel), 2022 Joint Meetings (Virtual), April 2022.
- [8] Co-organizer for minisymposium “Share the Joy in Teaching Differential Equations Through Modeling, Parts A and B” (with Brian Winkel), Mathfest 2022, Philadelphia, August 2022.
- [9] Co-organizer for short course “Differential Equations: A Toolbox for Modeling the World in Your Classroom with Your Students, Parts A and B” (with Brian Winkel and Tracy Weyand), Mathfest 2024, Indianapolis, August 2024.

### **Refereeing and Editorial Work**

- [1] Editorial board and referee for PRIMUS, 2008-2018.
- [2] Regular referee for Inverse Problems and the Rose-Hulman Undergraduate Mathematics Journal.
- [3] Refereeing work for Inverse Problems in Science and Engineering, Journal of Mathematical Analysis and Applications, European Journal of Applied Mathematics, IMA Journal of Applied Mathematics, SIAM Journal on Imaging Sciences, Applied Mathematics Letters, Applicable Analysis and Discrete Mathematics, SIAM Journal of Mathematical Analysis, SIAM Journal for Undergraduate Research, Mechanical Systems and Signal Processing, various IEEE journals, International Journal of Education in Science and Technology.
- [4] Reviewed book manuscripts for SIAM, World Scientific, Rinton Press, Pearson Education.

### **Other Service**

- [1] Reviewer for GRE Mathematics subject exam, 10/11, 6/12, 5/16, 5/21, 5/22, 5/24.
- [2] Member of SIAM’s Visiting Lecturer Program, 2006-2017.
- [3] MAA undergraduate poster session judge, AMS/MAA Joint Meetings, 2003, 2004, 2005, 2006, 2009, 2011, 2012, 2013, 2014, 2020.
- [4] Developed and taught a series of 12 weekly lessons for advanced 5th grade mathematics students at Clay City Elementary, Clay City IN, Fall 2006.
- [5] External reviewer for tenure cases at Colorado College (2006), the University of Evansville (2011), Amherst College (2012) and Simmons University (2019), and reviewer for promotion to full professor at Cornell University (2012).

- [6] Treasurer for Indiana's MAA section, 8/2012 to 8/2014.
- [7] External examiner for Ph.D. thesis, Åbo Akademi University, 2008.
- [8] External Ph.D. committee member for Nic Trainor, Rutgers University Department of Mathematics, April 2012.
- [9] External Ph.D. committee member for Matthew Charnley, Rutgers University Department of Mathematics, March 2019.
- [10] Regular contributor to the "Media Highlights" column in the College Math Journal, January 2012 to present.

### **HONORS AND AWARDS**

Selected by the board of trustees as the outstanding Rose-Hulman faculty scholar for the 2004-2005 academic year.

### **SPECIAL SKILLS**

Extensive programming experience in the "C" language. Experienced in Mathematica, Maple, and Matlab.

### **PROFESSIONAL MEMBERSHIPS**

Society for Industrial and Applied Mathematics (SIAM)  
Institute of Electrical and Electronics Engineers (IEEE)
