Circle which is more important to you:

Project preference

Teammates

Why do you think you deserve the top project choice? *If you really want a specific project, convince me that you are the best student for it. You can include information such as GPA, performance/grades in previous classes, internships, your (planned) technical electives, and any other skills you may have. By all means, include a copy of your resume or a cover letter – just like applying for a job or internship.*

What special (new) skills do you want to develop during capstone?

Have you completed the following ME courses?

Machine Component Design	Yes	No
Measurements	Yes	No
Heat Transfer	Yes	No
Mechatronics	Yes	No
