BENEFITS TO STUDENTS, FAMILIES AND BORROWERS

• Replacing the Expected Family Contribution (EFC) with the Student Aid Index (SAI)

Students and families will see a different measure of their ability to pay for college and will also experience a change in the methodology used to determine aid. The new formula removes the number of family members in college from the calculation and allows a minimum SAI of negative $1,500 to give financial aid administrators more insight when making determinations for students with especially challenging situations.

• Expanding access to federal aid

The FAFSA Simplification Act expands the Federal Pell Grant to more students and links eligibility to family size and the federal poverty level. Some applicants will be able to determine Pell Grant eligibility prior to enrolling in college based on their family size, household income, and state’s poverty standards.
