

Name: _____ Section: 2 (7th-8th) or 3 (9th-10th)

Do the reading assigned below and answer these questions either while reading or afterwards (your choice). **Not sure of an answer?** Ask your instructor to explain **at the beginning of the next class session**. You can then fill in your answer, still for full credit. (But no fair doing that unless you attempted the question first.)

Reading for this quiz:

The rest of Chapter 2 of your textbook (Zelle): Sections 2.5 through 2.8

1. Write a statement that assigns a variable `x` the value that is the product of 17 and 358.
2. Write a statement that assigns a variable `x` the value that is the sine of 1.7.
3. Write a FOR statement that prints the integers 0 through 20 (but not including 20).
4. Write a FOR statement that prints the integers 0 through 20 (including 20).
5. Write a FOR statement that prints the values of a list called `foo`.

If you have other questions about Chapter 2, ask them at your next class session!
