CSSE 220 Day 30 Generics Course Evaluations Exam Review

Questions

Generic Types

>>> Another way to make code more re-useful

Before Generics...

Collections just stored Objects

- Better than creating different collection classes for each kind of object to be stored
- Could put anything in them because of polymorphism
- Used casts to get types right:

```
    ArrayList songs = new ArrayList();
songs.add(new Song("Dawn Chorus", "Modern English"));
    ...
Song s = (Song) songs.get(1);
    songs.add(new Artist("A Flock of Seagulls"));
Song t = (Song) songs.get(2);
```

With Generics...

- Can define collections and other classes using type parameters
 - o ArrayList<Song> songs = new ArrayList<Song>(); songs.add(new Song("Dawn Chorus", "Modern English"));

```
Song s = songs.get(1); // no cast needed
```

songs.add(new Artist("A Flock of Seagulls"));

Lets us use these classes:

compile-time error

- in a variety of circumstances
- with strong type checking
- without having to write lots of casts

Example

- Create a doubly linked list
- Include min() and max() methods
- Use polymorphism rather than null checks for the start and end of the list
- Include fromArray() factory method

Generics Recap

- Type parameters:
 - class DLList<E>
- Bounds:
 - class DLList<E extends Comparable>
 - o class DLList<E extends Comparable<E>>
 - o class DLList<E extends Comparable<? super E>>
- Generic methods:
 - o public static <T> void shuffle(T[] array)

Course Evaluations

>>> Your chance to improve instruction, courses, and curricula.

- Exam is Monday, 6pm, G308
- Same format as previous exams, about the same length
- Comprehensive, but focused on Ch. 13–17

Some Possible Exam Topics

- Simple recursion
- Mutual recursion
- Time-space trade-offs
- Basic sorting algorithms
 - Selection, insertion, merge, and quicksort
 - Efficiency, best/worst case inputs
- Big-oh notation, estimating big-oh behavior of code

- Function objects
- Linked-list implementation
- Basic data structure use and efficiency
 - ArrayList, LinkedList, Stack, Queue, HashSet, TreeSet, HashMap, TreeMap

Generics
