

CSSE 304 Day 20

1. Another look at `map`.
2. Complete our “flyover view” of the provided code (we’ll continue to use the Day 19 handout here).
3. Preliminary to adding `let` to the interpreted language. `apply-env`: local and global environments.
4. **Add `let` to interpreted language (code will be added as a new case in `eval-exp`).**

Add `lambda` and `if` to the interpreted language. Changes to `proc-val` datatype, `eval-exp`, and `apply-proc`.
