

**Computer Science and Software Engineering 371**  
**Software Requirements and Specification**  
**Fall 2007**  
**Homework # 3a**

**Due:** Friday, September 14 at 11:55 PM

**Purpose:** To gain experience in identifying features and needs

In the remaining homework assignments, we will be working on an example scenario that is intended to help you with the team project. Your team's project manager and I will be playing various stakeholders. The project manager will act as account holders, while I will represent the Bank. Please make sure that you interview the both of us, before you turn in the assignments.

---

*"Bank de Rose"* was established in 1875 to assist employees of Rose Polytechnic to manage their money and investments. It has now grown to be one of the most successful banks in the Wabash Valley. *"Bank de Rose"* has ATM's for convenient access at various locations at the Rose-Hulman campus and in several locations in downtown Terre Haute. They have recently released plans on redesigning and updating their ATM software to enable a better user experience for their customers.

---

For Homework #3a, you have to turn in

- 1) Make a table of the features you have identified for an Automatic Teller Machine.
  - a.) For each feature, describe it using the table format discussed in the lecture. See Pg 100.
  - b. Correlate the specific client that is satisfied by each feature.

Please turn in your homework to the Homework #3a Drop Box in ANGEL.
