

**CSSE 371 Software Requirements and Specification
Fall 2007
Homework 8**

Due: Tuesday, October 9 2007 – In Class

Purpose: Practice specifying supplementary specifications.

Note: This is a team assignment.

What to do:

1. You can use any of your teams' Assignment 6 submissions to complete this assignment.
2. Specify usability, reliability and performance requirements for the Bank De Rose Project.
3. Comb through the selected Assignment 6 submission to see if the usability requirements mandate a change in any of the prototype screens. For one such screen, describe how the requirements affect the screen? Describe the changes that you need to make and draw a rough sketch of the new screen. You must turn in the old screen.
