Revised Teaching Materials

This milestone is to be completed as a team.

OBJECTIVES

The objectives of this milestone are for you to revise your teaching materials based on my feedback and to continue learning about your chosen language by making progress on your term project.

REQUIREMENTS

Your tasks for this milestone are to:

1. Continue preparing for your presentation in class during 10th week. To prepare for your session, you should submit revisions of the following materials, incorporate the changes I suggested, and any others you think would help, by the end of eighth week:

    - slides (**PDF only this time, and placed in** trunk/Web **within your team repository**) introducing your chosen language, similar to those I used for the first sessions of each language

    - a short daily quiz to be completed by your classmates, and

    - notes for a live demonstration on using your language. These notes can just be source code representing the final product that you'll produce during the demo, along with comments indicating what code you will begin with.

2. You also should continue with progress on your project as in past weeks:

    - complete the user stories that we agreed on at our previous meeting,

    - demonstrate the stories to me during our schedule team meeting, and

    - agree with me on a new set of user stories for the next milestone.

SUBMISSION

Commit your teaching materials and your project to your team SVN repository. If you would like me to copy quizzes for you or push materials to your classmates' SVN repositories, then tell me *by the end of ninth week* what material should be distributed.

DUE DATE

The teaching materials are due by midnight, Friday, of eighth week. The project user stories milestone is due at our regularly scheduled team meeting time during the week.
