# Code Review Checklist

OBJECTIVES
Walk me through interesting portions of your project code. Reflect on the process of learning and programming in your chosen language.

ITEMS TO DISCUSS
Please come to our meeting prepared to discuss the items below. That will help us make the most efficient use of our time.

☐ Discuss the overall architecture of your application.

☐ Show two or three places in the program that demonstrate unusual features of your language.

☐ Show a place where differences between your language and your prior experience caused some difficulties. (If there weren't any such places, be prepared to discuss why you think that might be the case.)

☐ Be prepared to discuss what you would do differently if you started over on the application.

DUE DATE
End of tenth week.
