

Draft Teaching Materials

This milestone is to be completed as a team.

OBJECTIVES

The objectives of this milestone are for you to develop a first draft of your teaching materials and to continue learning about your chosen language by making progress on your term project.

REQUIREMENTS

Your tasks for this milestone are to:

1. Begin preparing for teaching a half session of the class during 10th week. This teaching session will include a short project presentation, but will focus on introducing your chosen language to the class. To prepare for your teaching session, you should submit drafts of the following materials by the end of sixth week:
 - slides (PDF, PowerPoint, or Keynote) introducing your chosen language, similar to those I used for the first sessions of each language
 - a *short* daily quiz to be completed by your classmates, and
 - notes for a live demonstration on using your language. These notes can just be source code representing the final product that you'll produce during the demo, along with comments indicating what code you will begin with.
2. You also should continue with progress on your project as in past weeks by completing the user stories that we agreed on at our previous meeting. (Because of fall break, we will not have team meetings during sixth week.)

SUBMISSION

Commit your teaching materials and your project to your team SVN repository.

DUE DATE

The teaching materials are due by midnight, Tuesday, of sixth week. The project user stories milestone is due at our regularly scheduled team meeting time during seventh week.
