

## Final Presentation

This milestone is to be completed as a team.

### OBJECTIVES

Complete your term project and demonstrate it to your classmates. Teach your classmates about your chosen language. Discuss how your chosen language affected the development of your project.

### REQUIREMENTS

Your task for this milestone is to give a 25 minute in-class presentation on your language and term project. In preparing your presentation, please keep the following requirements in mind:

- Teach your classmates enough about your language that they would know how to start experimenting with it.
- Reflect on the strengths and weaknesses of your chosen language and whether you would choose to use it again. You may want to discuss the sorts of projects that you might use it for.
- Include a demonstration of your final project.
- Discuss how you used interesting features of your chosen language to implement your solution.
- Your grade will be partly determined by your presentation length. You will be penalized for a presentation that is too short, including one where you are obviously “vamping” to fill time. In fairness to your classmates, you won’t be allowed to go over time. The intent of the time requirement is to encourage you to reflect on your language and project by putting some serious effort into preparing and practicing your presentation.

### SUBMISSION

Besides your in-class presentation, you must also:

1. distribute your quiz to the class,
2. collect the quizzes,
3. grade them,
4. sort them by students’ last names, and
5. return them to me before 10am on the weekday after your presentation.
6. You must also meet with me sometime during 10th week and walk me through the code for your project.

### DUE DATE

Your presentation is due according to the schedule as decided in class and posted on-line.
