

Onsite Robot Documentation Presentation Guidelines

Each team give an onsite presentation to a group of judges during the 2010 regional tournament. Your score for this presentation will be factored in to your overall documentation score. We encourage all teams to prepare for their presentation by reviewing the guidelines below as well as the Onsite Presentation Rubric.

Presentation Guidelines:

1. Each team must bring a printed document with them to the onsite judging. We recommend a notebook, folder or display that might includes items listed in the rubric. **You must bring a PRINTED document(s) with you. No electronic presentations will be accepted.**
2. Teams should sign up for an onsite judging time when they sign in at the tournament. Teams are responsible for being ready to present at the judging area at their appointed time. Presentations should be given by a maximum of 2-student team members. Teams will have no more then 10 minutes to make their presentation.
3. The onsite judge will expect you to cover the items and topics listed in the rubric.
4. Your onsite presentation will account for 30% of your documentation score. The other 70% will be based on your team's performance in the required online documentation activities. Documentation accounts for 1/3 of your overall score in the tournament.
