

Mendeley Overview and Overleaf Integration

Jason Yoder

2/6/2024

Mendeley

- Allows you to maintain an online bibliography
- Can use unique IDs to search for corrected information
- Can easily export references to different formats

Look up metadata by DOI

Integrates with Overleaf

- You can synchronize as a special file inside of Overleaf

The screenshot shows the Overleaf interface. On the left, the 'Upload' button is highlighted with a red circle. In the center, the 'From Mendeley' option is also highlighted with a red circle. To the right, a dialog box titled 'Import a BibTeX file from your Mendeley account' is open. It has a 'File Name In This Project' field containing 'references.bib'. On the far right, a file explorer shows 'research_lab_references.bib' selected, and a preview of its BibTeX content is visible.

- Allows direct import of citations of papers into the doc
